Profile

The Indonesian Bible Society (IBS) Printing Plant was established in Ciluar Village on February 9th, 1966 in an area of 5,124 square meters, which was inaugurated by the Deputy Prime Minister of the Republic of Indonesia, dr. J. Leimena and the ribbon-cutting ceremony was done by Mrs. Hartini Soekarno. The printing plant then relocated to Nanggewer on October 4th, 1995 in an area of 11,800 square meters, which was approved by the Minister of Religion of the Republic of Indonesia, dr. H. Tarmizi Taher. At present, IBS implements an ISO 9001:2015 quality management system, Safety and Health Management System, and Work Environment Impact Analysis.

The IBS Printing Plant received a prestigious award from the Indonesian Museum of World Records (MURI) for printing the largest Study Bible in the World on February 9th, 2012 using 40 gr thin paper (thin Bible paper). The Study Bible has an open size of 208 x 147 cm and a total weight of 120 kg.

In addition to printing for domestic needs, the IBS printing plant has printed Bibles for neighboring Bible societies, such as the Bible Society in Malaysia, Philippines, Myanmar, India, and Australia.

Moreover, the IBS Printing Plant also takes production orders from local printing companies, such as Gramedia, Subur, and Balebat.

The IBS Printing Plant has the following advantages:

1. Using digital setting and montages.
2. Able to print on thin bible paper (24-40 gsm).
3. Using automatic sewing machines with high speed and good quality thread.
4. Work on the book block processing with an in-line machine directly connected to a three side trimmer and book production line (book cover attachment).
5. Fast and accurate thumb index processing.

Production Processes
